New ways to communicate successfully about shared human and animal health issues

Preventing Obesity in People and Pets: A One Health Approach

2-Day Symposium for Veterinarians and Physicians

November 10-11, 2016
Atlanta, Georgia, USA

Adopt concrete approaches to preventing obesity in both pet owners and their pets. Global experts in the human and veterinary fields will jointly present the best tactics for promoting fitness in the entire human and animal family—centering their recommendations in regular activity, a balanced diet, and healthy weight.
